PROFESSIONAL SUMMARY

Results-driven Full-Stack Developer with **6+ years** of expertise in building scalable SaaS applications using **Laravel, Vue.js, and Flutter**. Proven track record of architecting multi-tenant systems, implementing secure payment integrations, and delivering high-performance solutions across finance, logistics, and eCommerce domains. Specialized in translating complex business requirements into intuitive, maintainable codebases with emphasis on security, scalability, and user experience.

TECHNICAL SKILLS

Backend Development: Laravel (Eloquent ORM, Queues, Events, Middleware, Scheduler) • REST APIs • WebSocket • Laravel Reverb • PHP • Multi-tenant Architecture • Authentication (JWT, Sanctum, Passport, RBAC)

Frontend Development: Vue.js (Vuex, Pinia, Vue Router) • Nuxt.js • JavaScript (ES6+) • Laravel Blade • TailwindCSS • Bootstrap 5 • Responsive Design • jQuery

Mobile Development: Flutter • Android Studio • Cross-platform Development • Firebase Integration • API Consumption

Database & DevOps: MySQL • PostgreSQL • SQLite • Query Optimization • DigitalOcean • Git • CI/CD

Tools & Design: Figma • Whimsical • Lucidchart • Postman • UX/UI Design • System Architecture

Additional: Python • Node.js • Stripe Integration • Webhook Management • SaaS Architecture • Agile Methodologies

PROFESSIONAL EXPERIENCE

Full-Stack Developer | MonsterClaw Ltd | *Oct 2023 – Present*

- Architected and deployed **multi-tenant SaaS applications** using Laravel and Vue.js, serving 500+ active users
- Integrated **Stripe billing system** with automated webhook event handling for subscription management
- Designed and implemented **RESTful APIs** consumed by web and mobile applications
- Developed comprehensive dashboards with **advanced reporting and data export** capabilities
- Managed cloud infrastructure on **DigitalOcean** with automated deployment pipelines
- Collaborated with design teams to transform **Figma prototypes** into production-ready interfaces

Technical Associate | DigiPro Solution Ltd | *Oct 2022 – Oct 2023*

- Built **full-stack applications** integrating Laravel backends with Vue.js/Nuxt.js frontends and Flutter mobile apps
- Implemented **state management** using Vuex/Pinia for complex data flows
- Developed **real-time synchronization** features between web and mobile platforms
- Led **QA testing and release cycles**, ensuring 99% bug-free deployments
- Mentored junior developers on best practices for API design and component architecture

Software Developer | MonsterClaw LLC | *Oct 2021 – Sep 2022*

- Created responsive **Vue.js/Nuxt.js SPAs** with seamless Laravel API integration
- Ensured **cross-browser compatibility** and mobile responsiveness across all deliverables
- Contributed to **client portals and SaaS dashboard tools** serving enterprise customers
- Implemented **Git workflows** following agile methodologies for efficient team collaboration

Web & Mobile App Developer | A'qa Technology | *Sep 2019 – Sep 2021*

- Developed **Flutter applications** with Firebase integration (Realtime Database, ML Kit, Cloud Messaging)
- Implemented **Google Vision API** for image recognition and processing features
- Built scalable Vue.js and Nuxt.js applications with focus on performance optimization

IT Expert | Development Design & Consultant Ltd | *Apr 2017 – Aug 2019*

- Managed IT infrastructure including server configuration, maintenance, and security auditing
- Provided technical support for hardware, software, and network systems
- Executed server patching and upgrade planning to ensure system reliability

KEY PROJECTS

TrackReward.com – Multi-Tenant Affiliate Tracking SaaS

Tech Stack: Laravel • Vue.js • MySQL • Stripe • Webhooks
Multi-tenant affiliate platform with real-time commission tracking, automated recurring payments, and seamless WooCommerce/Shopify integrations. Built scalable attribution logic handling 10,000+ monthly transactions.

EasyInvoiceBuilder – Invoice Management Platform

Tech Stack: Laravel • Vue.js • Nuxt.js • Firebase
Full-featured invoice creation tool with real-time editing, PDF generation, and drag-drop template builder. Designed complete UX flow resulting in 40% faster invoice creation.

Way of Work – HRMS Platform

Tech Stack: Laravel • Vue.js • Flutter • RESTful APIs
Comprehensive HR management system with employee data management, payroll processing, attendance tracking, and recruitment workflows accessible via web and mobile apps.

BgasNetwork – LPG Delivery & Fleet Management

Tech Stack: Laravel • Vue.js • Firebase • GPS Integration
End-to-end logistics platform with real-time vehicle tracking, fuel monitoring, and maintenance scheduling. Reduced delivery time by 25% through optimized route planning.

Hairline – Hair Transplant Consultation Platform

Tech Stack: Laravel • Nuxt.js • Stripe
Complete solution for clinic management with appointment booking, multi-role dashboards, and affiliate commission payouts via Stripe.

RankMonster – SEO Analytics Dashboard

Tech Stack: Laravel • Vue.js • TailwindCSS
 SEO analysis tool featuring keyword tracking, backlink monitoring, and competitor analysis with automated data fetching and real-time visualizations.

KNSAM – Site Access Management System

Tech Stack: Vue.js • REST API • Biometric Integration
 Centralized access control system for telecom sites, reducing unauthorized entry by 70% through biometric authentication.
